

Strong Day Four Performance from Black NAFA Males

Black NAFA and Demi Wild male mink sold today at 100 percent during a day of active bidding. In particular, the high quality, short nap Black NAFA mink that NAFA is so well known for, sold extremely well to very strong competition and prices. The sale of short nap Demi Wild males also followed this trend while the longer nap and smaller sized mink sold at easier prices. China and Greece dominated the buying in the auction room but there was good support from all other international fur markets.
